Abstract of DE 4233398 (A1)

The seat surface (1) is pivotally mounted (7) between the two side struts of the back support frame (4) and rests on a support (8) which can be locked in position on the two side struts of the front support frame. A storage space is produced between the two side struts of the front support frame (3), while the seat surface acts as the back support surface for the luggage. The front support frame acts as side support (3A). Between the front and back support frame is a horizontal luggage shelf (5) near the ground. The support frame has at least two wheels (6). ADVANTAGE - The picnic chair can be used as well for transporting luggage or picnic material.
